1 I am here to find you and I will...

$$(y + x^{-1})$$

2 I did it... But at what cost

$$(0 + -1 \cdot 1 \cdot x^{(-1-1)})$$

3 So, Turbo-Mega ochev

Wait a second and it will be even better

$$(0 + -1 \cdot x^{(-1-1)})$$

4 So, Turbo-Mega ochev

Wait a second and it will be even better

$$(0 + -1 \cdot x^{-2})$$

5 The final trivial transition

$$(0 + -1 \cdot x^{-2})$$
